About Me

My fields of interest are Artificial Intelligence, Machine Learning, Data Science and Analytics, Big Data, and Cryptography. I have experience in Robot Process Automation, Machine Learning, Software Development, Android Application Development, Web Application Designing, and Migration. I am fascinated by how Machine Learning applications in Big Data problems can result in well-defined patterns and many unnoticed interpretations. I would like to leverage my technical knowledge and management skills across various fields. I am an inquisitive person; I like to learn new things.
