WORK EXPERIENCE

System Engineer
Infosys Ltd

04/2019 – Present   *Chennai*

Achievements/Tasks

- Created a automatic mail classification system for a bank using state of the art AI system.
- Worked on a major project to dump data whenever their happens to be a threat to real time online transaction feeds.
- Automated various migration and deployment system using Unix and python.

PERSONAL PROJECTS

Psychological Evaluation of mass crowd
- Created a automated facial identification and recognition system to virtually create a psychological report and further analyse a great crowd to identify their motive and perspective of any event.

Automatic Grid Shutdown System
- This device works on real time to analyse the load in the network and automatically shifts and share the load to the parallel network, thus saving money to eradicate the network failure in power distribution system.

EDUCATION

Electronics & Communication Engineering
Jeppiaar Maamallan Engineering College

07/2012 – 05/2016

SKILLS

Python | Shell Scripting | Data Analytics

SQL | Machine Learning | Computer Vision

Deep Neural Networks | Process Automation

ACHIEVEMENTS

Achievement Name

CERTIFICATES

Applied Machine Learning from Coursera

Machine Learning from Stanford University

HCL Certified Embedded Engineer

LANGUAGES

English
Native or Bilingual Proficiency

Tamil
Native or Bilingual Proficiency

INTERESTS

Trekking | Community Involvement
